Career objective

Enthusiastic Frontend Developer with hands-on experience in React, Next.js, and Tailwind CSS, gained through building numerous personal projects. Passionate about creating intuitive and engaging web applications. Eager to bring my skills to a dynamic team where I can learn, grow, and contribute to exciting projects.

Education

2022-2026 (Currently third-year student)

University: Inha University in Tashkent (Bachelor's degree)

Faculty: School of computer and software engineering

Experience

Participated in the Open Data Challenge Hackathon (2024, January), where my team and I secured 3rd place. Collaborated closely on developing an innovative web application using React and Tailwind CSS to address real-world data issues. This experience honed my problem-solving skills and demonstrated my ability to work effectively in a team environment, even without formal company experience.

Professional Skills

- Proficiency in React
- Expertise in Next.js
- Strong knowledge of HTML and CSS
- Proficient in JavaScript and TypeScript
- Skilled in responsive mobile-first design
- Excellent problem-solving abilities
- Keen attention to detail
- Ability to work effectively under pressure
- Strong team collaboration skills

Personal projects
